INSTRUCTIONS TO PUBLISHERS

Extreme care should be exercised to insure that the specifications for advertising to be set other than solid be definite, clear, and specific since no allowance will be made for paragraphing or for display or leaded or prominent headings, unless specifically ordered, or for additional space required by the use of type other than that specified. Specifications for advertising other than solid and the advertisement copy submitted to the publisher will be attached to the voucher. The following is a sample of solid line advertisement set up in accordance with the usual Government requirements.

DEPARTMENT OF HIGHWAYS & TRAFFIC.
D.C. Bids are requested for first spring 1966 cement concrete repair contract, including incidental work, Washington, D.C., Invitation No. C-6676-H, consisting of 11,000 sq. yds. PCC Class BB sidewalk repair and 2,000 cu. yds. PCC Class A pavement, alley, & driveway repair, both cut repairs only. Bidding material available from the Procurement Officer, D.C. Sealed bids to be opened in the Procurement Office at 3:00 p.m., November 15, 1965.

PUBLIC NOTICE

The U.S. Environmental Protection Agency (EPA) is accepting public comment regarding the proposed closure of a hazardous waste disposal area at the U.S. Department of Agriculture Yakima Agricultural Research Laboratory (YARL), 3706 West Nob Hill Blvd., Yakima, Washington 99802, State/EPA ID No. WAD120513957.

Background Information

The Yakima facility is a U.S. Government Agricultural Research Laboratory, which performs laboratory and field testing of a wide variety of pesticides and herbicides. No agricultural chemical products are manufactured on-site.

The area to be closed is a septic tank drainfield which was used from 1965 to June 1, 1985 for disposal of a wide variety of dilute pesticide wastes. In 1987 the EPA issued an enforcement action to YARL requiring the facility to conduct soil and groundwater sampling and complete a closure plan. In response to this action YARL has installed groundwater monitoring wells, removed portions of the septic tank drainfield, and conducted soil sampling on-site. A final closure plan was submitted to EPA dated September 12, 1989, which is the basis for this notice. The proposed project involves closure of this unit in accordance with WAC 173-303-610 and 40 CFR Part 265 Subpart G requirements.

Copies of the facility closure plan, the 1987 EPA order issued to YARL, and analytical data submitted to EPA by YARL are available for public review at the office of the Washington Department of Ecology, 3601 West Washington, Yakima, Washington 98903.

Public Comment and Hearing

EPA will consider all written comments received during the comment period prior to taking final action on the closure plan. Written comments will be accepted for 30 days after publication of this notice.

Subsequent to the comment period, EPA will approve, disapprove or modify the closure plan. Please send written comments to the U.S. Environmental Protection Agency, Waste Management Branch HW-112, 1200 Sixth Avenue, Seattle, Washington 98101, Attention: Bill Adams.

Charles E. Findley, Director
Hazardous Waste Division
U.S. EPA Region 10
